

The Department of Pediatrics, Division of Nephrology at the University of Mississippi Medical Center in Jackson, Mississippi is seeking a full-time academic Pediatric Nephrology specialist at the rank of assistant/associate professor to join our faculty group. Job responsibilities will be primarily providing inpatient consultations and outpatient clinic care. Educational development training is a plus but not required.

The Division of Pediatric Nephrology offers a full range of nephrology services including all modalities of dialysis: hemodialysis, peritoneal dialysis and CRRT. Clinical responsibilities will include all aspects of pediatric nephrology, including management of patients with acute and chronic kidney disease, expertise in renal replacement therapy (CRRT, PD, and acute hemodialysis) and management of kidney transplantation. Ample opportunity is available for research, publication and presentation with the new School of Medicine and Translational Research Center buildings. The Division of Pediatric Nephrology has an active research lab and ongoing research projects including active collaboration with the Clinical Research Support Program.

The Department of Pediatrics at UMMC is committed to providing excellence in education, clinical care and research. Over 170 faculty members within the department provide clinical support to the Children's of Mississippi network in all specialties. Training for a medical school class of over 150, post-graduates in categorical pediatrics, medicine/pediatrics, child neurology and multiple sub-specialty fellowships are supported by the faculty. Children's of Mississippi is a referral center for the entire state of Mississippi with most referrals coming from central part of the state. UMMC is home to the only hospital in the state devoted exclusively to the treatment of sick and injured children and averages 9,000 admissions a year. Children's of Mississippi Hospital, which more than doubled its space with the opening of the Sanderson Tower in November 2020, has 250 beds, which includes a 32-bed pediatric intensive care unit and 107 beds in the state's only Level IV NICU. Over 80,000 outpatients are seen in the pediatric emergency room and outpatient clinics located across the state.

University of Mississippi Medical Center and Children's of Mississippi are located in Jackson, the state's capital. Jackson is located in the central part of the state, has a temperate climate year-round and affordable living. Multiple desirable attractions for both indoor and outdoor activities are located in the metro area and within easy driving distance.

Candidates must be board certified/board eligible to practice pediatric nephrology.

J1-visa and H1-visa holder are encouraged to apply.

EOE, M/F/D/V.
