

What steps over what time have you planned during the 2 years to achieve the goals you have listed on the application form?

- For the goals you hope to achieve during the 2 years, ***please share what you hope to complete by 6, 12, 18, and 24 months as you work to meet your goal.***
- The committee understands that over the 2 year time span, goals and time lines may be changed as the project is undertaken, but we would like to have at least some preliminary details as to how you are planning to achieve your stated goal.
- Remember that the ***best goals should be specific, measurable, achievable, relevant, and attainable in a time frame.***
- You may have several goals and divide those goals over any planned time period.
- **Please use this example below as a model for your reply.**

Overall goal: Over the 2 year partnership, train 2 nurses to be local experts in the care of peritoneal dialysis patients

6 month goal: Create a curriculum of needed knowledge and identify the nurses who will become local experts

12 month goal: Completion by nurses of any needed instruction or clinical components of the curriculum

18 month goal: Successful delivery/management of some aspects of peritoneal dialysis care by local nurses

24 month goal: Assessment of local nurses for their competence providing all aspects of care in the curriculum
